Stylish and modern ebook seller plugin, with 3D book preview, optional preview file for each book, automated email delivery and order processing.

== Description ==

Ebook Store Plugin for WordPress is a tool that allows you to sell, watermark, encrypt and deliver by email and/or download ebooks to your customers, via beautiful one click checkout experience. The pro version is capable of encrypting the ebooks upon download or email delivery. It supports PDF, ePub, TXT, Mobi and Zip files.

The Pro version also supports WooCommerce integration, so you can sell and deliver encrypted ebooks through WooCommerce checkout, no additional setup required except enabling the feature and assigning an ebook to a woocommerce product.

Video demonstration:

<https://www.youtube.com/watch?v=HxYzlaEHPU4>

Video of WooCommerce cart integration:

<https://www.youtube.com/watch?v=dJTvA0-lGmI>

Ebook store now supports integration with WooCommerce so you can add ebook store items to your WooCommerce products and let customers download ebooks from the checkout complete page. The PDF encryption and watermarking works well and will use the customer data to watermark the ebook which is a proven method to prevent piracy.

Payment Methods:

With Ebook Store you can accept payments with:

1. [PayPal](<http://paypal.com>) - Account, Credit Card, eCheck, Bank / Wire transfer payments.
2. [Stripe](<http://stripe.com>) - Credit Card payments, BitCoin.
3. Apple Pay - coming soon!

Are there translations?

Yes, the front-end of the software is translated to: English, German, French, Spanish, Hindi, Chinese and Russian. More translations are coming.

Are there any limitations?

The Free version can not encrypt PDF files and put watermarks. For this you need the \$30 full version UPGRADE from [<http://www.shopfiles.com/index.php/products/wordpress-ebook-store>] (<http://www.shopfiles.com/index.php/products/wordpress-ebook-store>)

What does it do?

It will let you sell your ebooks in a very stylish and secure way. It's PRO version is the only extension for WordPress that allows encryption of the sold Ebooks, by putting passwords and watermarks / print protection to the PDF files for sale.

How it works?

Very easy and intuitive! All you need to do is upload a book with its cover's information and put a price on it. Once you do that you can copy paste the book embed code to place it inside the article. Once you have done that please make sure you have filled in your PayPal account where you want to receive the payments.

How to contact support?

Simply by email support@shopfiles.com and URL:

<http://www.shopfiles.com>

That's all you need to do in order to start selling files! :)

== Installation ==

Getting started is really easy and just takes a few minutes, no coding skills required.

1. Enter your PayPal or Stripe settings under Settings > Ebook Store.
2. You create a new Ebook from Ebook Store > Add New where you upload all ebook files and set a price.
3. The new ebook will appear in the list along with the needed shortcodes to embed the order form. There are three types, full order form, just buy button that you can style or a direct order link.
4. You go to the post or page where you want to insert the order form or button and paste the shortcode on the desired position.
5. Once you visit the page you will see the form or button you created. This is what your customers will see and they can start order with a single click and then pay via PayPal or Stripe. In case you use WooCommerce integration, you can use all available payment methods supported by

WooCommerce.

6. Once order is completed, users will see a dedicated thank you page that the plugin created (and you can modify) or if you use WooCommerce integration, they can access their downloads from their order confirmation page.

7. Optional e-mail will be sent with the ebook(s) as attachments, watermarked and password protected. The password is available on the order confirmation page and the email delivery.

If you use WooCommerce integration from the Pro version:

1. After activation of plugin, go to Ebook Store > Add New

2. Upload all ebook files and set a title and price.

3. Go to (WooCommerce) Products and open/create the product that will also deliver the ebook.

4. Go to the new Ebook Store tab in the product editing screen and select the ebook store ebook you just created.

5. Save and once someone buys that WooCommerce product, on the order confirmation page they will see Downloads section with all ebook formats and the password(s) if encryption is enabled.

6. Email delivery will also work with WooCommerce and the customer will receive the ebook via email as a link and/or attachment.

== Frequently Asked Questions ==

= What is the flow? How do I use this? Is there a quick guide? =

It's really easy!

1. You install the plugin.

2. Then you are going to Ebook Store > Add New Ebook

3. You fill in title, description, cover image and upload ebook formats. You set a price.

4. You copy and paste the embed code in a post or page, or you can use the dedicated ebook embedding widget while you work on a post or page. It embeds the ebook order form with a single click.

= Is there any limitation on how many sites I can use it when I upgrade? =

No there are no limitations.

= What if it doesn't work? =

It will, if there is a problem, there is real human support to help you out. In the settings form there is a direct messaging widget to send a question to the developer and get instant reply.

= How does it secure my PDF files? =

The plugin can disable printing, apply watermark with buyer's information on each page, or put a password to the encrypted file.

== Screenshots ==

1. The default look of the ebook 1-click order form. It can be put inside any post, page or module/custom html widget.

2. The details view, comes with a nice 3d effect that works trough all modern browsers.

3. This embed box shows up on every page or post you edit, upon clicking on it, you embed the ebook order.

4. The Add New Order screen. If encryption is enabled, the files will also be delivered encrypted.

Email with the files and/or links is also sent.

5. PayPal email for receiving payments, WP Affiliates and WooCommerce integration enabler.

6. PayPal return to merchant text, currency select and font size settings for the ebook order form.

7. License key field and PDF encryption settings for encryption, random password, blank password ability (still encrypted), login email as pdf password feature, PDF master password feature.

8. Disable PDF printing, modification, annotation forms, QR code watermarking with transaction / buyer data, buyer info watermark on each page feature. Ability to fill a form upon each order that you can design and add fields as you wish. Ability to require @kindle email for the email delivery mail to be sent directly to the buyer's device.

9. Mailchimp integration feature via API key. Link expiration setting and download limit. Email delivery and Attach files feature settings. This way the customer receives email with the files attached or just download links depending on configuration. Optional VAT settings.

10. Thank you page template editor, you can redesign it as desired.

11. Email delivery email editor, it can be customized/transated to meet your needs.

12. The form for the "Fill a form upon order" feature. You can customize the html code and add more fields.

13. WooCommerce integration, adding ebook store product type, ability to select which ebook to be delivered with it's additional formats. PDF file can be encrypted.

14. WooCommerce download table for the ebook(s) in the cart. Users can buy multiple ebooks with WooCommerce shopping cart and Ebook Store plugin.

== Changelog ==

= 5.725 =

* Added South African Rands (ZAR) support in PayPal currency options.

= 5.724 =

* Fixed problem with ebook store item titles not showing up properly.

= 5.719 =

* UI fixes in backend, switched from cookie to option to store the decision to dismiss the WP Super Cache warning.

= 5.717 =

* WP Super Cache compatibility fixes.

= 5.715 =

* Fixed pdf link in email delivery for standalone orders.

= 5.713 =

* Fixed email template and thank you page defaults.

= 5.64 =

* Fixed for woocommerce integration to show the proper orders for the customers.

= 5.63 =

* Fixes for email delivery and thank you page templates, added downloadlinks_html variable in the templates that will work for both.

* Fixed a problem

downloading bonus ebooks with woocommerce orders.

= 5.62 =

* WooCommerce compatibility fixes.

= 5.6 =

* Added a turn off switch for ViewerJS previews.

= 5.599 =

* Added Ebook Store downloads section to show under Downloads section in WooCommerce, when Ebook Store items are purchased through the optional integration between the two plugins.

= 5.598 =

* Removed IRIS color picker as it caused troubles for some users.

= 5.597 =

* Added a feature where you can disable the automated refreshes once ebook encryption is in progress and show a retry download link.

= 5.596 =

* Added a note in the downloads section where to find the ebook store downloads in ebook store.

= 5.595 =

* Problem with pdf reader function was resolved so it doesn't throw warnings.

= 5.594 =

* Fixed a problem with email delivery link being incorrect for manually added orders.

= 5.593 =

* Fixed a warning that was showing before ebook upload that encryption would not work.

* Added online reading mode instead of download for woocommerce.

= 5.590 =

* Fixed a problem where the direct order link for free files was forwarding to paypal.

= 5.589 =

* Fixed a warning in the ebook bonus section.

= 5.587 =

* Fixes for the bonus ebooks links when paypal is used.

= 5.586 =

* Problem with readme file corrected.

= 5.586 =

* Bonus ebooks links, called with %%ebook_bonus%% were not shown properly in email.

= 5.583 =

* CSS fixes and random password fix for bonus ebooks.

= 5.582 =

* More fixes to the bonus feature and the row layout in the pro version when multiple books are shown in one row.

= 5.581 =

* Fixed bonus ebooks feature that was previously delivering the main book in some cases.

= 5.579 =

* Compatibility update.

= 5.578 =

* Fixes a typo and backend.

= 5.573 =

* Fixes for woocommerce email delivery.

= 5.571 =

* Fix for options page issue on some providers with php 7.

= 5.570 =

* Fix for initial setup not reading default parameters.

= 5.569 =

* Fix for order csv export routine.

= 5.568 =

* Added ViewerJS for PDF preview files.

= 5.567 =

* Fixes in woocommerce email delivery to trigger only when a certain configurable order status is matched.

= 5.566 =

* Fixes in PayPal sandbox mode when it was sending back to order cancelled url

* Fixed a problem where vat was added twice at some point.

= 5.565 =

* Version compatibility update.

= 5.564 =

* Version compatibility update.

= 5.562 =

* Fixes in pricing table and warnings.

= 5.560 =

* Added external gateways support. Stripe now included for direct credit card payments in Business edition of the plugin, you can find it here: [Ebook Store Pricing](<https://www.shopfiles.com/index.php/products/wordpress-ebook-store>)

= 5.44 =

* Fixed a problem with WooCommerce integration where pricing was hiding after saving a product of type Ebook store.

* Confirmed WordPress 4.6 compatibility.

= 5.43 =

* Added Content-length header for all downloads.

= 5.42 =

* Added support for WP Affiliates Manager. You can now pay affiliates commissions for the sales they bring to your site with ebook store plugin.

= 5.41 =

* Fixes related to the xml sitemap corruption of "author" links.

* Media uploads are no longer forced to ebook store folder.

= 5.40 =

* More fixes related to the integration with WooCommerce, now Content-type headers are handled properly.

= 5.39 =

* Fixes in the woocommerce integration.

= 5.37 =

* Removed an unused module.

= 5.36 =

* We added a direct order link feature so you can use your current landing pages without doing any redesigns and just use our direct order link from the Ebooks Store > Ebooks page. You can share the link over email and facebook or elsewhere.

= 5.34 =

* Removed error reporting on download processing routine as it sometime caused headers to be sent due to strict standard notices, breaking the downloads.

= 5.32 =

* WooCommerce integration added. You can now add the ebooks to the WooCommerce cart and use all it's payment gateways.

= 5.31 =

* WooCommerce integration added. You can now add the ebooks to the WooCommerce cart and use all it's payment gateways.

= 5.30 =

* Added the ability to encrypt files with blank passwords, so the print/copy/modify protection still works, but the file opens without password.

= 5.29 =

* Fixed a critical error due to WooCommerce integration routine.

= 5.28 =

* Fixed a problem where shortcodes were not replaced on the thank you page and the download link was missing.

= 5.27 =

* New features to the admin interface for changing font-size of the buy now and details links.

= 5.26 =

* Interface improvements in the admin section.

= 5.24 =

* Ireland added to PayPal default locations options list.

= 5.23 =

* Added a feature to be able to enable password encryption for free files so when logged in users download, their email is used as password.

= 5.22 =

* Fixed an issue where on some server long ipns calls were missing variables.

= 5.21 =

* Fixed an issue where the rewrite rules were not flushed properly.

= 5.20 =

* Fixed an issue with the newer paypal ssl requirements on sandbox and live transactions.

= 5.19 =

* Fixed an issue where %%download_links%% keyword was not working in email delivery template for other ebook formats like epub mobi zip and txt.

= 5.18 =

* Fixed an issue where encrypted PDF documents were not printable.

= 5.17 =

* Added a feature to generate a random password for each PDF sold and encrypted.

= 5.16 =

* Added ability to upload all file types in the full version as the main ebook file. This is useful when people want to sell audio or video files with the plugin.

= 5.15 =

* Compatibility update.

= 5.14 =

* Fixed problem where some book formats were not uploading.

* Finish translation added. Thank you Timppa Airaksinen.

= 5.13 =

* Compatibility check for WordPress 4.4.

= 5.12 =

* Fixed a warning that occurred sometimes upon uploading.

= 5.11 =

* Fixed a problem where free downloads were available even after unpublished.

=

5.1 =

* Kindle email requirement feature added.

= 5.0 =

* PRO Version encryption fix when attach files feature was off.

= 4.998 =

* Fixed a problem with free file downloads.

= 4.995 =

* Added encryption for free files.

= 4.994 =

* Free download fix for Pro licensed customers.

= 4.993 =

* Removed download warning.

= 4.992 =

* Fixes in the ebook details form.

* Added ability for offline payment / manual payment and to generate a new order and send the encrypted pdf file via email.

= 4.98 =

* Fixes in the readme.

= 4.96 =

* Removed menu position declaration to avoid conflicts with other plugins.

= 4.95 =

* Localization update.

= 4.93 =

* Package fixes, removed samples to reduced size.

= 4.92 =

* Added stats feature.

= 4.91 =

* Fixed a menu item detection where the book template wasn't showing.

= 4.9 =

* Fixed a php warning.

* Interface improvement of ebook upload section.

= 4.8 =

* Removed some warnings.

* Custom post type icon added.

* Custom post type view of the ebook added.

= 4.7 =

* Fixes regarding the ebook embedding and the free downloads feature.

= 4.6 =

* Various small fixes and translation improvements.

= 4.5 =

* Fixed function chaining for older php versions.

= 4.3 =

* Automatically create thank you page.

* Blank PayPal account warning.

* Master and user password PDF DRM function
